Address: Walton workshop Lahore, 34524, Lahore, Pakistan (Home)

● ABOUT ME

Dot Net Developer with more than three years of experience in design and development of web-based and windows based applications using Dot Net technologies. Create Web API's , Rest & Soap Services. Hands on experience in all phases of software development life cycle (SDLC) like requirement gathering, analysis, architectural and detail design, documentation, development, testing and implementation using Agile methodologies like Scrum and test driven environment. Also experience of AWS and Azure Devops.

● WORK EXPERIENCE

08/2022 – CURRENT Lahore, Pakistan

SOFTWARE ENGINEER SIRIZAPPS

As a part of software development team i have to design, build, test, and maintain software solutions.

Coding and Development: Mainly i do the coding and development in C# for Application Mosino One and after proper testing i have to deploy it through GIT.

Identifying and fixing defects and issues in the software: For this i have to troubleshooting and diagnosing problems reported by users or discovered during testing and Fix them.

Database Integration: Creating and maintaining database schemas and queries. Integrating databases (e.g., SQL Server, MySQL) with .NET applications.

Code Quality and Testing: Writing clean, maintainable, and well-documented code. Conducting unit testing, integration testing, and debugging to identify and resolve issues. Ensuring software quality through code reviews and continuous integration

Collaboration: Collaborating with cross-functional teams, including product managers, quality assurance engineers, and designers, to ensure that the software meets business and user requirements.

Meetings and Communication: Participating in team meetings, stand-ups, and other communication channels to discuss progress, challenges, and project updates.
